Experience

•Software Developer at Gaming Hunt Pvt Ltd – From April 2018 - Present

1. Prendilo (.NET MVC Framework)

I was in the team that was responsible for CRM, which is a piece of customer relationship management software. I led the effort to build a feature that allows users to easily keep track of business expenses. My responsibilities included the initial research, planning and managing the project, creating wireframes, and writing out our specs.

2. Sofa Design and Automation (.NET MVC Framework)

Design the selection of each part of the sofa (handle, cushion etc.) based on user selection display the complete structure in the desired location (e.g. living room, bed room).

3. Crane Design (Windows Form application)

Fully Design and Automate Crane as per user demand worked on Autodesk Inventor and Solid Works libraries to automate the development of the various parts of the model and arrange them together for complete structure
